Product description

The iPod interface allows the Apple iPod, iPod nano, iPod mini and iPod Photo to be connected to the car's electrical system. An iPod can store up to 1000 standard music CDs. The music stored on the iPod is played by the audio system and the iPod is also charged at the same time. By selecting genres, artists, albums or playlists, it is possible to access your entire music collection at any time. Depending on the equipment in the car, operation is via the iDrive controller, the multi-function steering wheel or directly on the radio. All lists, tracks or artists are displayed on the on-board monitor or the radio display.

The iPod interface supports the following functions

- Playback of all tracks stored in the iPod
- Operation of the iPod interface via iDrive controller, multi-function steering wheel or radio
- Track search by artist, album, playlist or genre using the on-board monitor or radio display
- Podcast playback
- SC/SCAN: Play the tracks in the current list for 10 seconds each
- RND/RANDOM: Random playback of all tracks stored in the iPod
- RPT/REPEAT: Repeat the current track
- Track jump: Jump to the next or previous track
- Fast forward
- Display of detailed information about the current track (artist and time index)
- Charge the iPod battery

Supplied package

- Interface
- iPod connection cable
- Fibre optic cable
- Multilingual owner's manual

Note

The Apple iPod, iPod mini, iPod Photo and iPod nano are not supplied and are not available from BMW.

More information on operating and general information about the iPod interface is available in the owner's manual. ◀

iPod interface

Compatibility

- The iPod is placed in the glove compartment in all vehicles where it is connected to the cable
- If the iPod interface is to be retrofitted to a car with a BMW CD changer (SA 672), the CD changer must be removed first. It is not possible to operate the BMW CD changer (SA 672) and the iPod interface at the same time.
- The iPod interface cannot be installed in E65 cars with a rear screen (SA 603)

The iPod interface can be connected with the following equipment:

- E87/E90 Professional radio (SA 663), Business navigation (SA 606) or Professional navigation (SA 609)
- E6x Business radio, Professional radio (SA 663), Business navigation (SA 606) or Professional navigation (SA 609)

Restrictions

- A maximum of 255 artists, albums or genres can be selected

At least 500 tracks can be selected for each artist, album or genre, according to the equipment in the car.
