Baseline	HTHS (cP)	SA (%)	P (%)
SAE J300	> 3.5	≤ 1.6	Report

### Instructions

Select a specification from 'Specification list' to add to the performance comparison. Once selected the specification's performance map will be displayed on the chart along with some basic requirements in the data grid. A maximum of 15 specifications may be selected and overlayed to compare their relative performance. [Click here for a short demonstration](#)

The performance charts are not a literal translation of a performance specification and should not be used as a replacement for evaluating engine oil performance in accordance with the relevant vehicle manufacturer's requirements.

### Key

Baseline	Baseline performance level
HTHS	Viscosity at high temperature and shear (cP)
SA	Sulphated Ash (%)
P	Phosphorus (%)
S	Sulphur (%)
