1. FlowUX synesthesia (APP) can be found here:

<https://play.google.com/store/apps/details?id=projekt.auto>

2. FlowOverlays (Icon Change) can be found here:

<https://discord.com/channels/702437587679313920/795969896496103424/795972527892594689>

3. Knob functions Mercedes

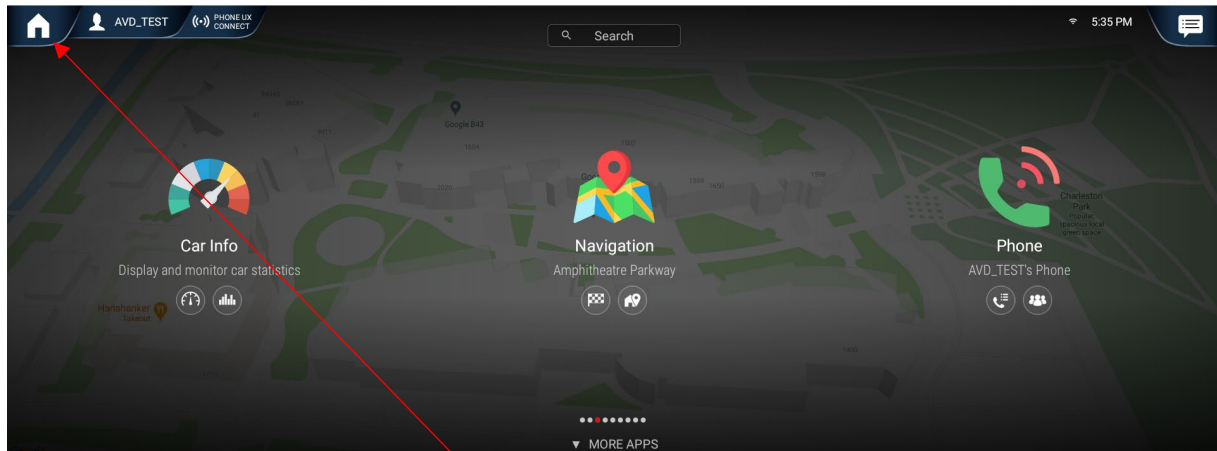

Open sub-icons

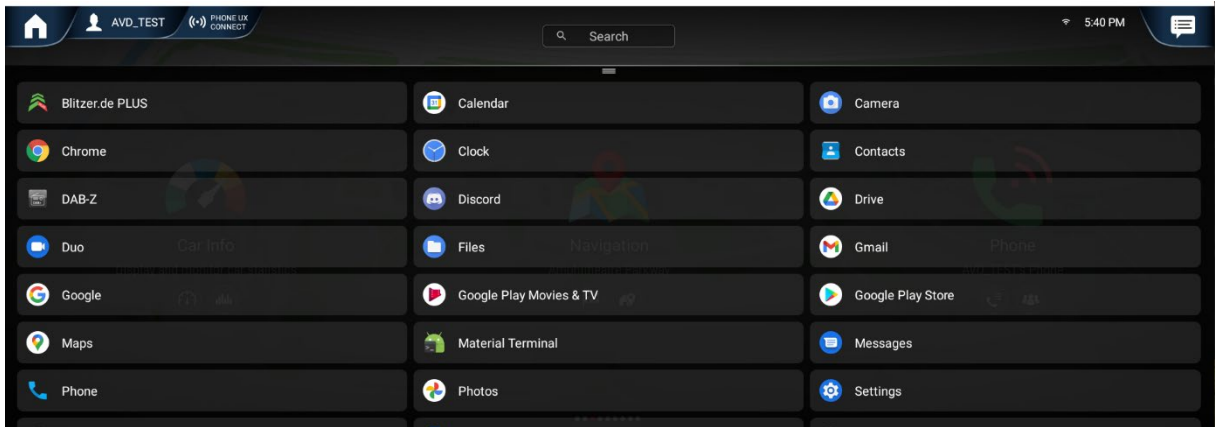

Push the knob to the left or right side it is equal as click/touch the sub icons.

Go-to-home-screen

First click on „c“ or similar is equal as click/touch on home button. If you reached home-screen, a second click will open „more apps“. A third click will close „more Apps“and you are back on home-screen.

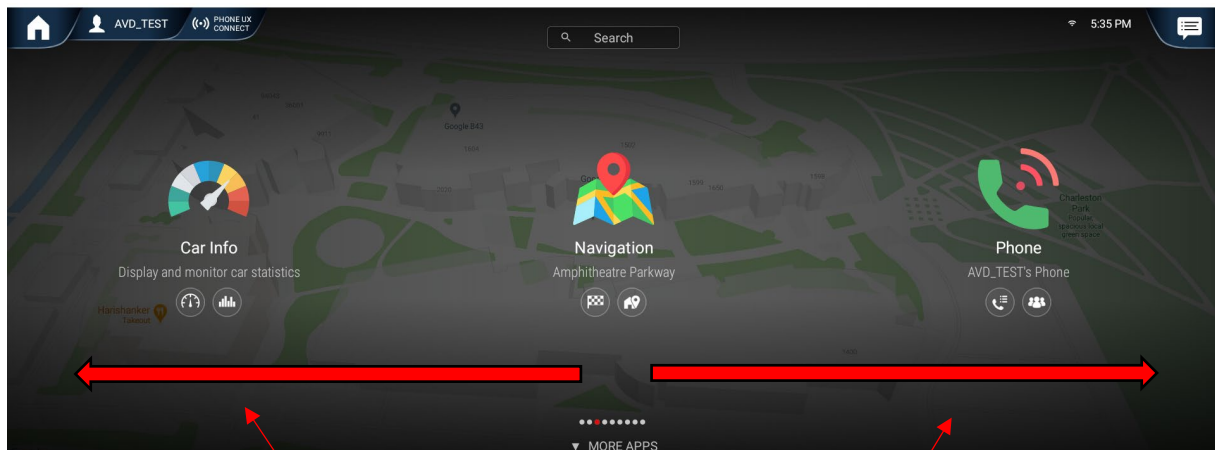

Go Back

“Back” should be clear, goes backwards.

Turn knob

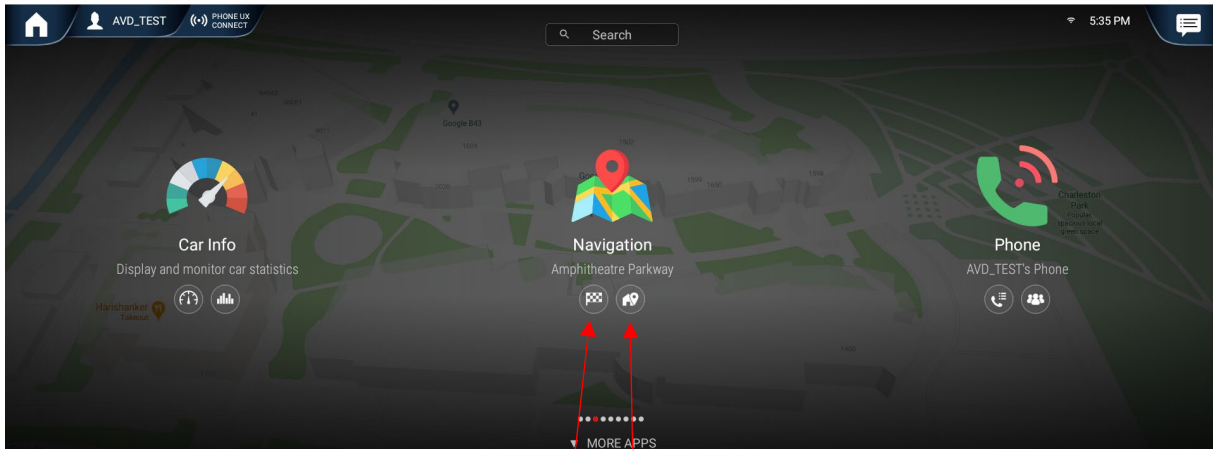

Turn the knob anti-clockwise or clockwise to slide through the flowUX icons

4. Knob functions BMW

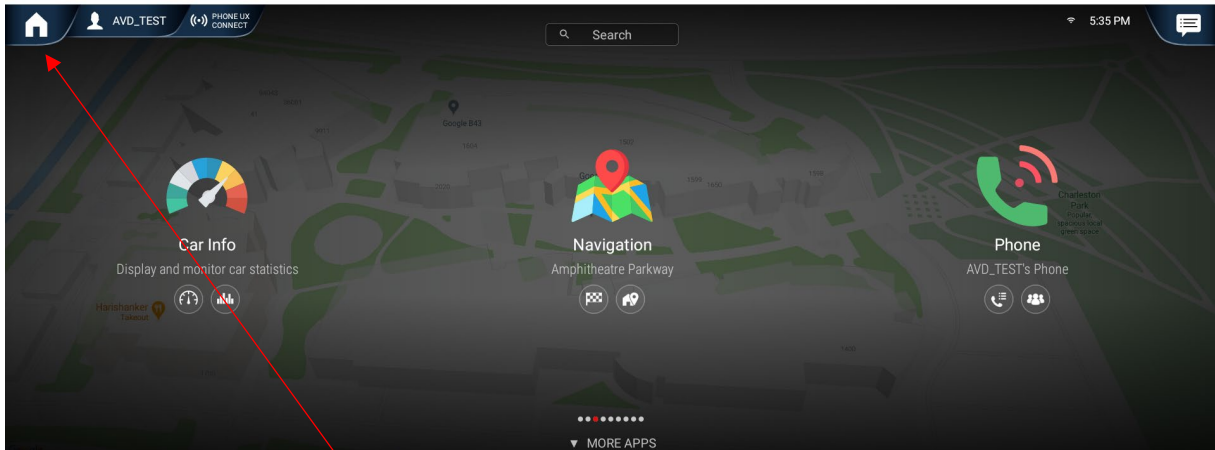

Open sub-icons

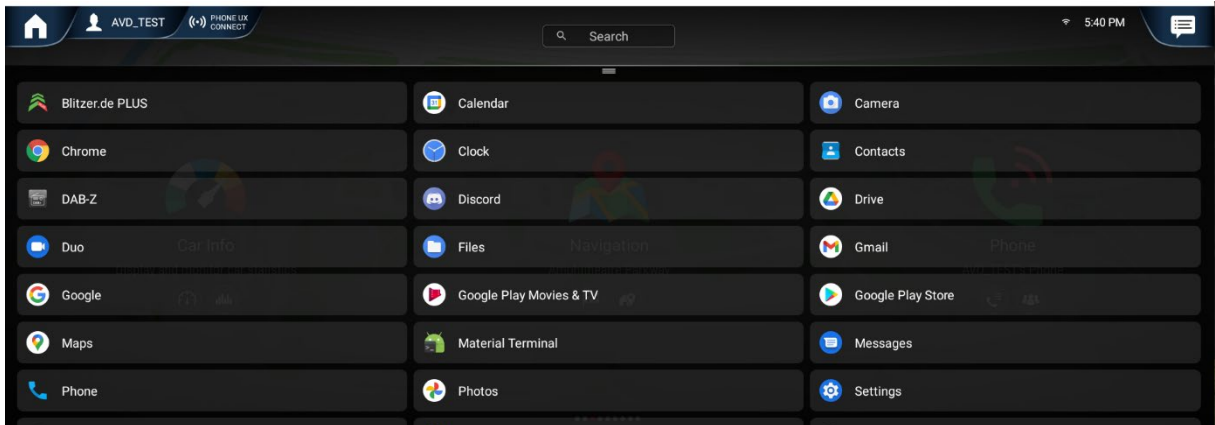

Push the knob to the left or right side it is equal as click/touch the sub icons.

Go-to-home-screen

First click on „MENU” is equal as click/touch on home button. If you reached home-screen, a second click on „MENU” will open „more apps”. A third click will close „more Apps” and you are back on home-screen.

Go Back

“BACK” should be clear, goes backwards.

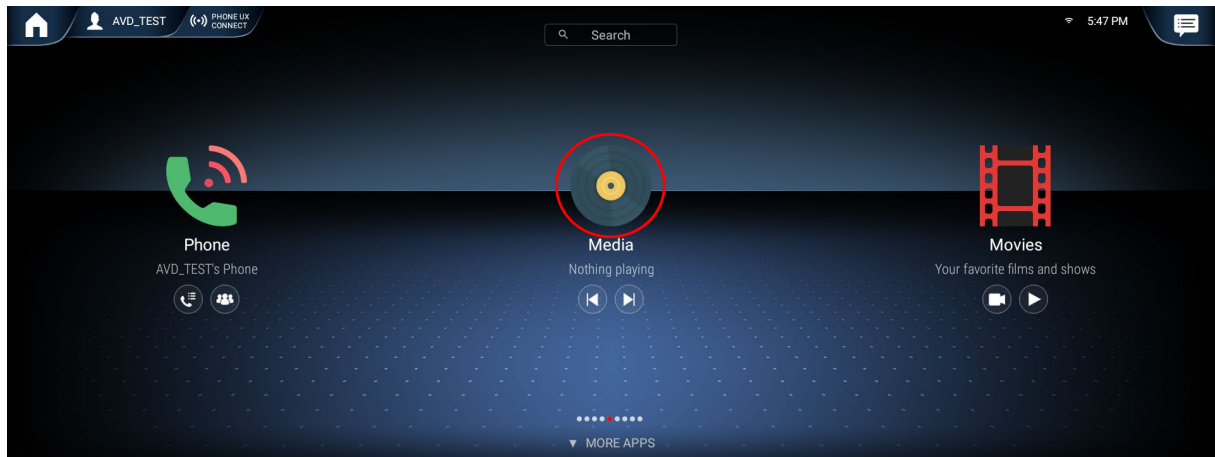

Turn knob

Trun the knob clockwise or anti-clockwise to slide trough the flowUX icons

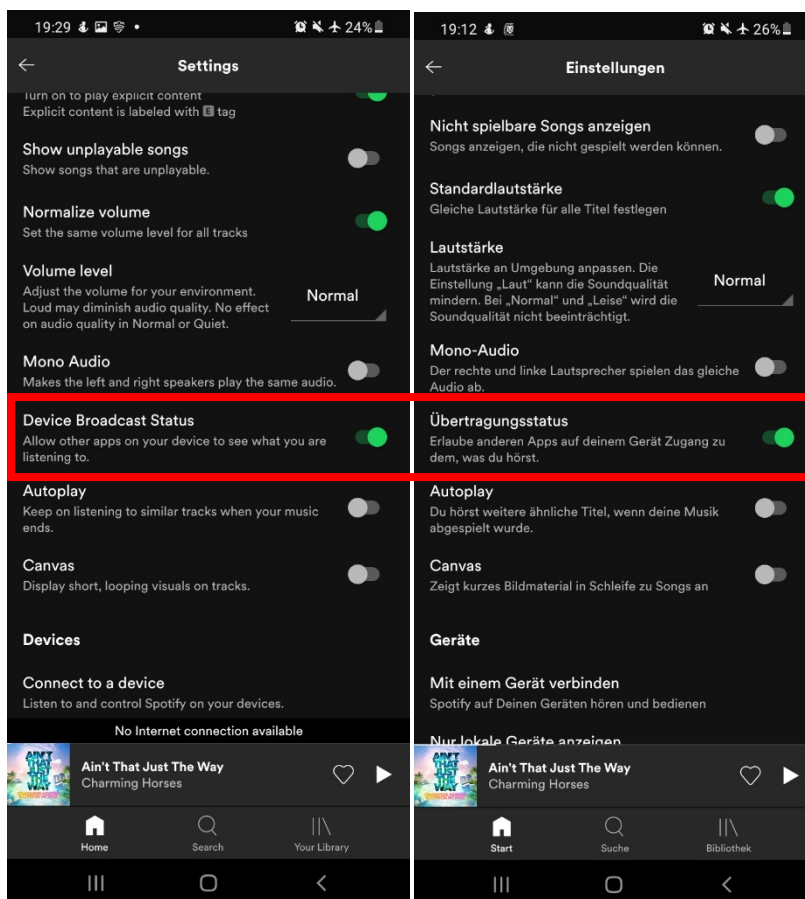

5. Media icon/title & play/pause music

Double tap on screen- or double „push the knob“ on music icon to play or pause the music. This (ONLY THIS AND RADIO) icon is able to show the album cover of the actually played song.

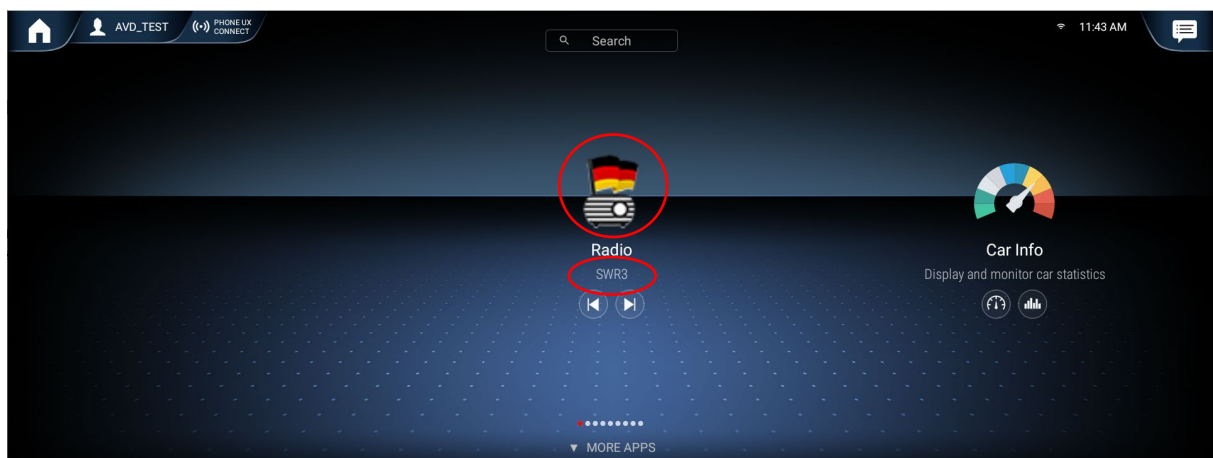

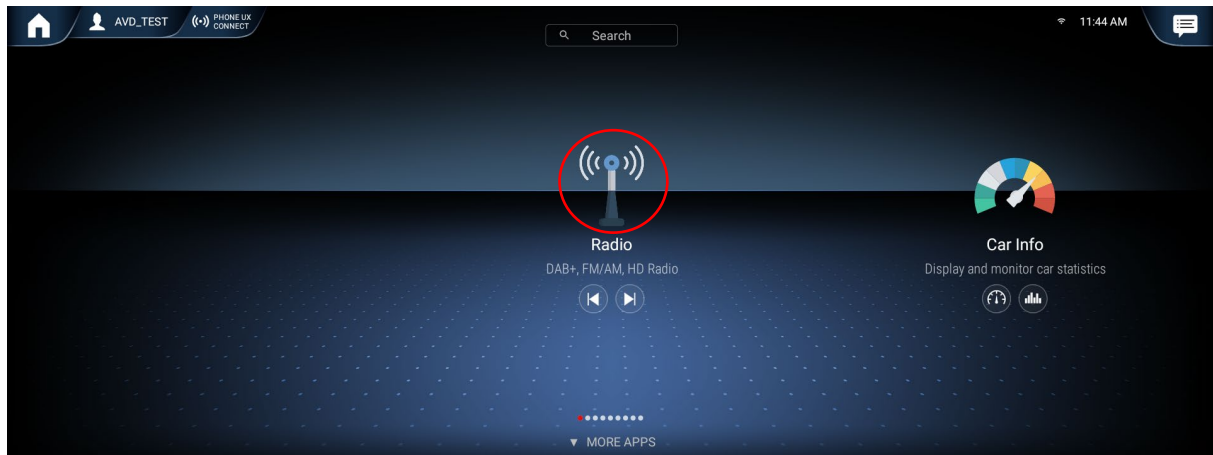

There for you have to enable in your player “broadcast status”. Not all players are supported or support this feature. Spotify is supported. Attached a English and German screenshot.

6. Radio icon/title & play/pause radio

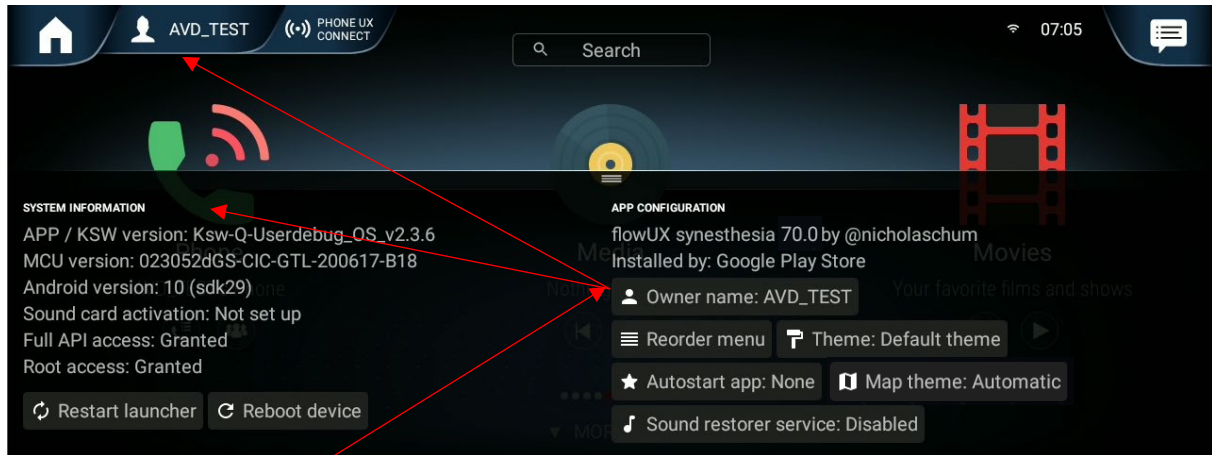

Double tap on screen or double „push the knob“ on radio icon to play or pause the radio. This (ONLY THIS AND MEDIA) icon is able to show the radio station cover and the actually played/streamed text of radio station.

Actually DAB-Z is supported.

7. Settings of flowUX

Change name

You can change the name here this name is shown in some places.

Restart launcher

If you click on this button flowUX restarts.

If you click and hold this button flowUX and your used music player will restart.

Reboot device

The whole HU will be restarted. (This button is only available if your device has ADB on port 5555 enabled. For example, on AVD it is not available)

Theme

Here you can change the background color of flowUX and you change the icons with an flowverlay.

See here:

<https://discord.com/channels/702437587679313920/795969896496103424/795972527892594689>

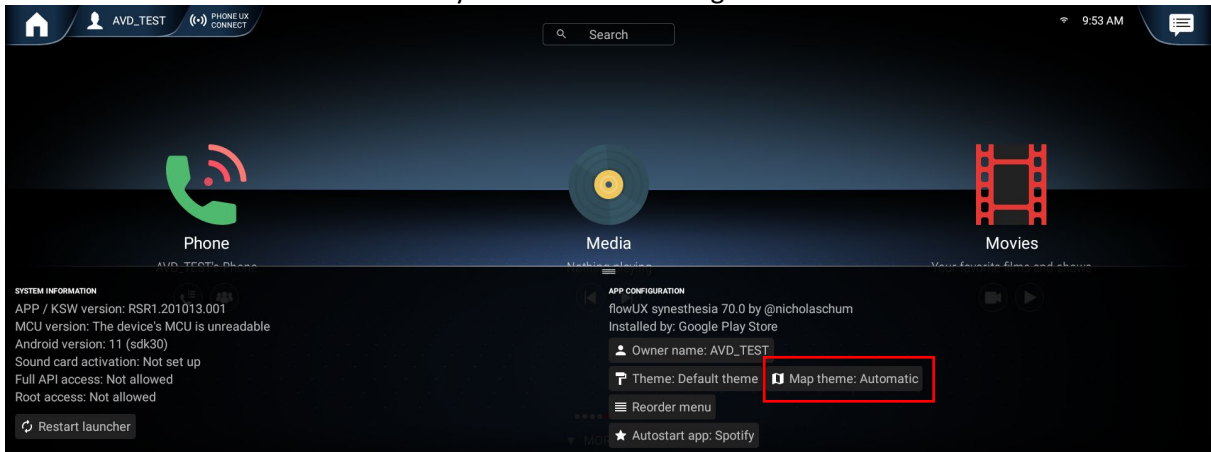

Autostart app

Here you can select an app which will be autostart after booting process. It take some seconds it is triggered by internal system is booted system variable.

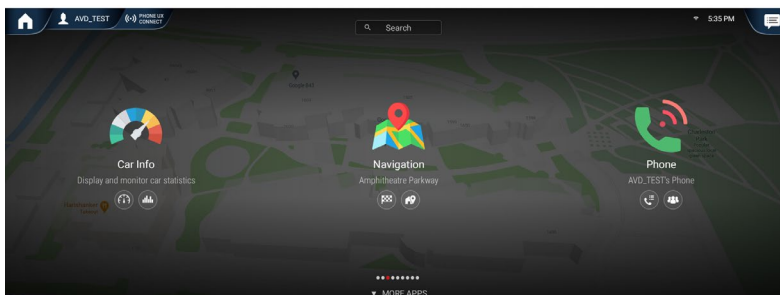

Map theme:

Change the brightness of the background map behind navigation icon.

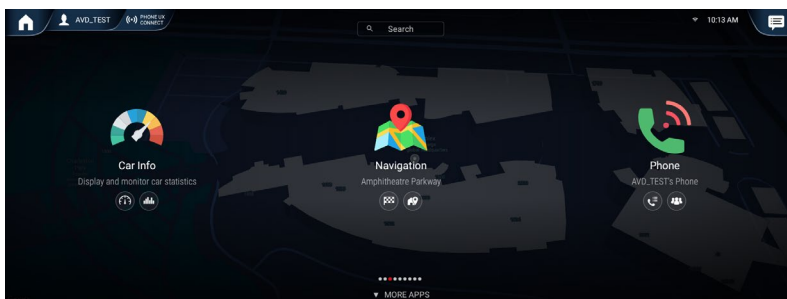

Automatic: it is switched automatically between dark and light mode.

Light mode:

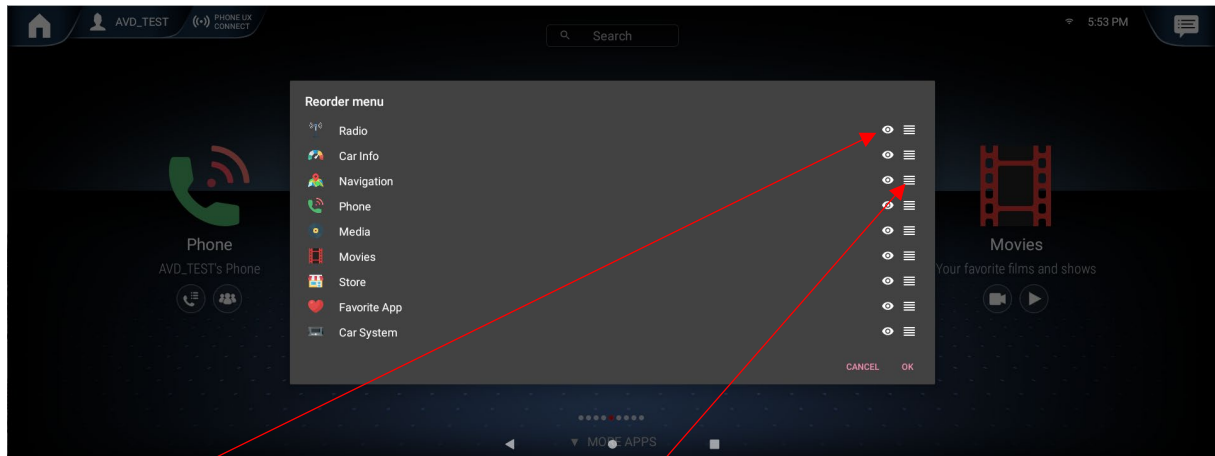

Dark mode:

Sound restorer service

You can enable or disable Sound restorer service. This service is working when you come back from Car System (aka NTG/CIC's FM functionality), it will switch media source automatically. It correctly switches the media source in NTG back to Media so that music playback in an app like Spotify will work switching back from Radio

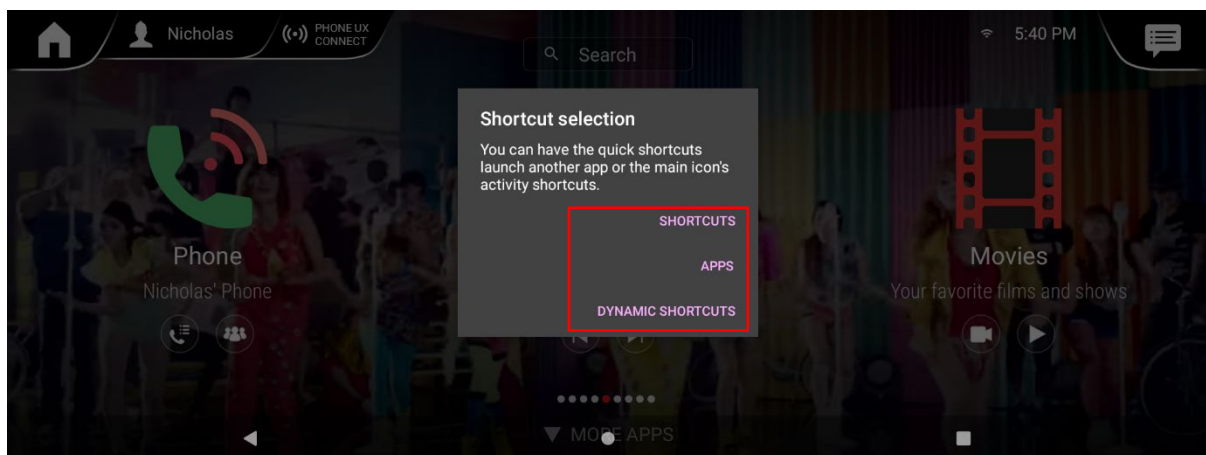

Reorder menu

You can hide icons here and you can change the order of icons here.

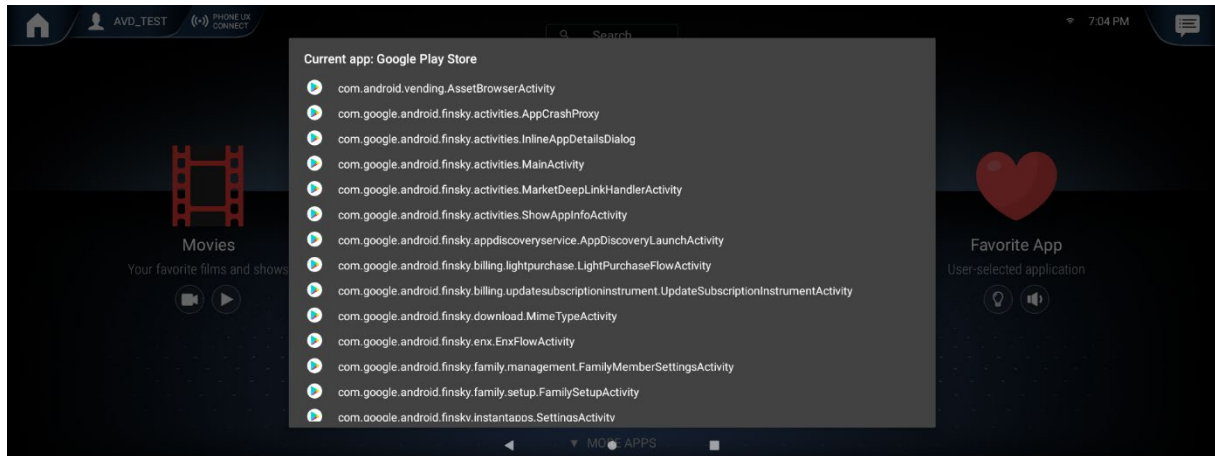

8. Shortcuts FlowUX

Settings of flowUX special shortcuts

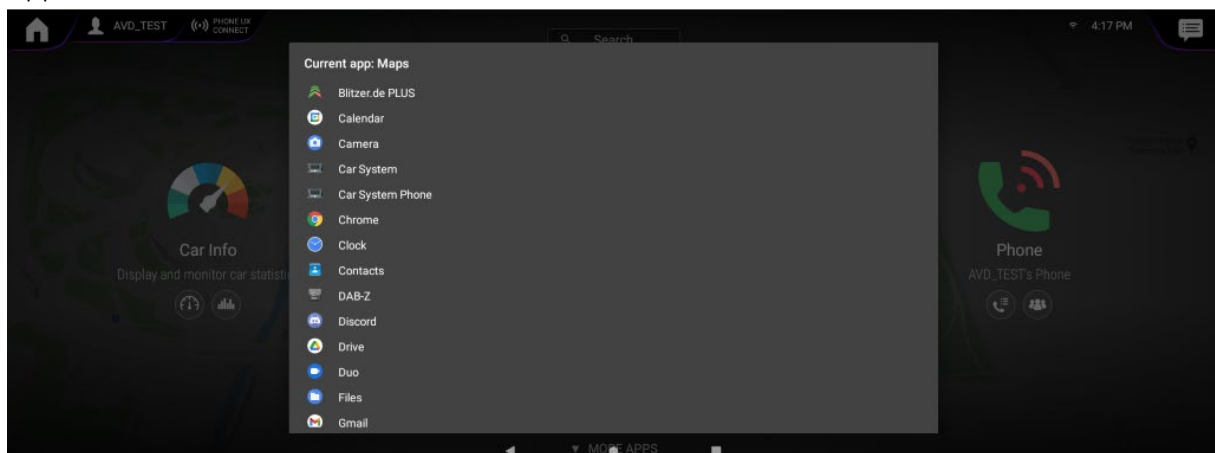

If you click and hold on a icon you can set the shortcut of it. You can choose between “SHORTCUTS” (sub-activity of main app) and “APPS” (list of all installed apps) and “DYNAMIC SHORTCUTS” (here you can access to shortcuts of main app for example “home” and “work” of google Maps). Follow the pictures in sequence.

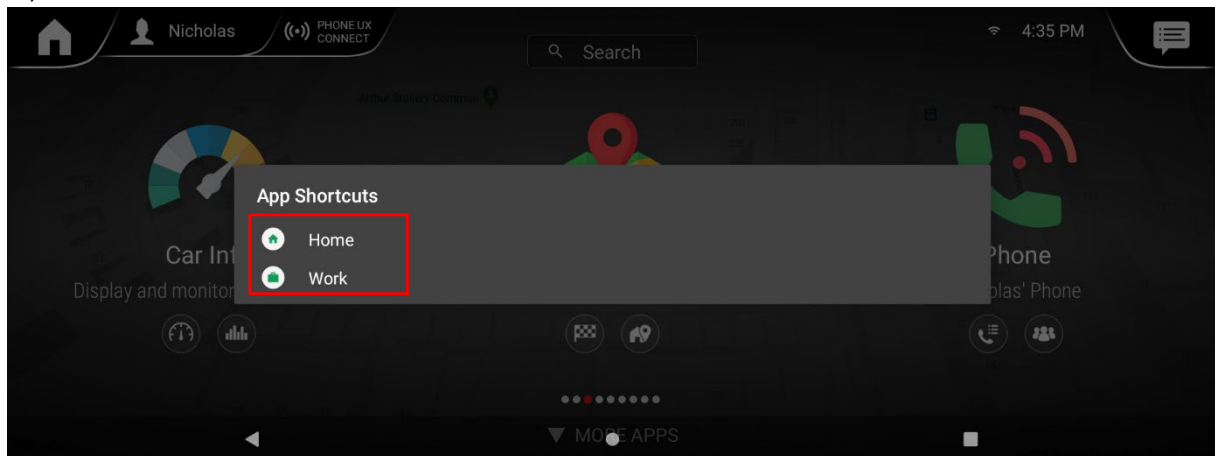

Sub-icons

App list

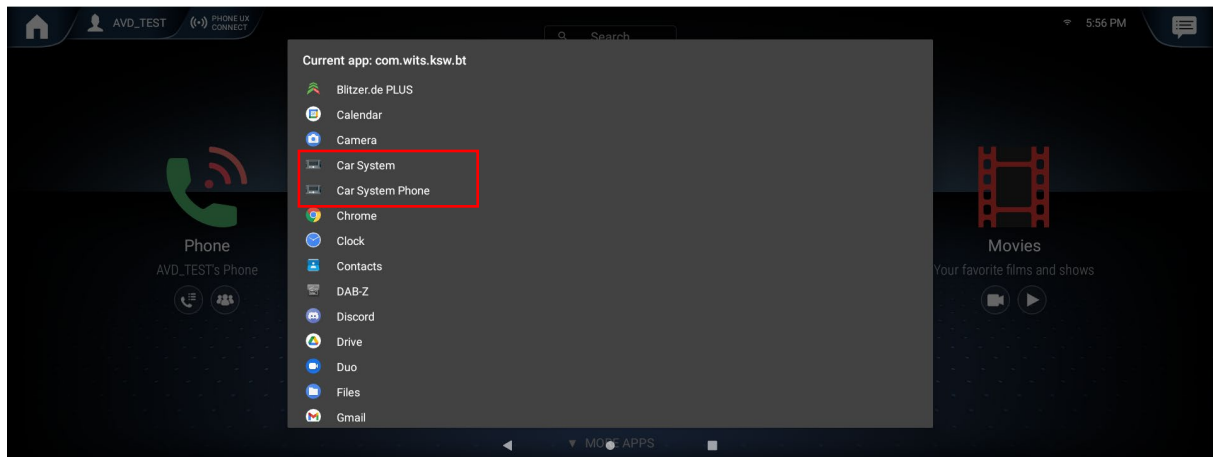

Dynamic shortcuts

Shortcuts provided by flowUX

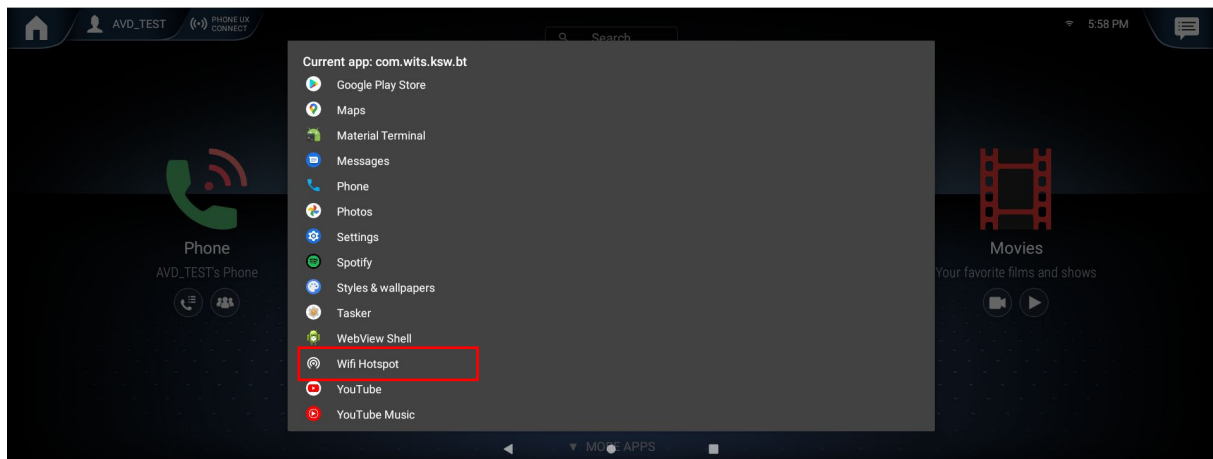

Car system shortcut

With this shortcut you can go back to the Car system (Car System Phone **works not on all HU units**, this is a unfixable bug because it must be provided in MCU otherwise it will not work)

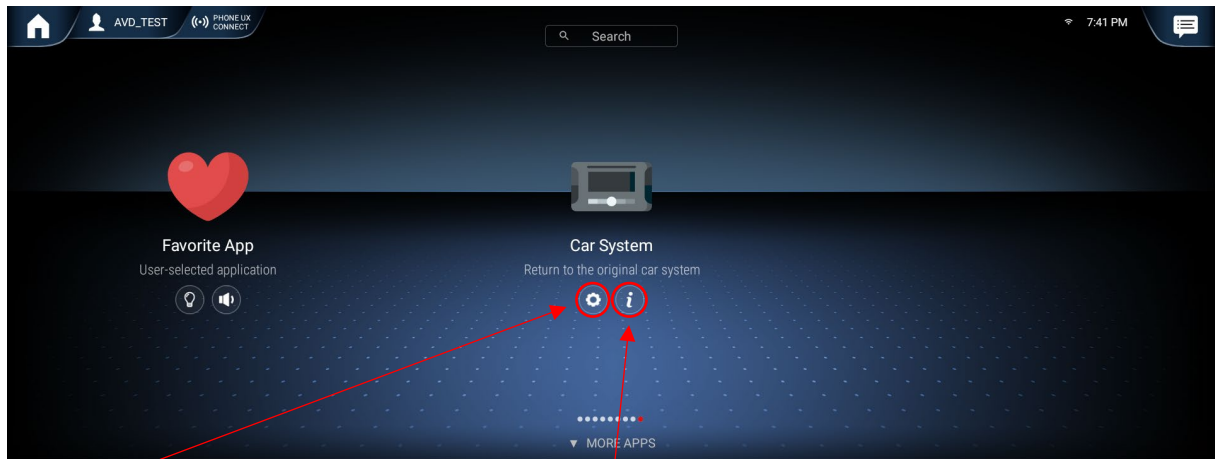

Wifi-Hotspot shortcut

With this shortcut you can go directly to Wi-Fi-hotspot for „in-car-office“ functionality.

9. Fixed shortcut sub-icons

The left icon links to the KWS setting of HU. The right icon links to the standard Android settings.
